

Let your dreams come true
Connection with the Essence of Being, Love and Light

What this Seminar is About
The NOVA (Non-Ocular Vision Activation) and QSR (Quantum Speed Reading) seminars are about developing all your senses. These in-person seminars are consecutive and progressively build up your skills.

Would you like to open your inner screen?
Do you want to walk through the room with your eyes closed and see?
Do you want to get great school grades?
Do you want to learn how to heal?

In cooperation with Raymond Fernando, educator and researcher, I am developing new learning methods to retrieve information from the morphogenetic field and open the inner Screen.

NOVA Is a Course About the Exceptional and The Astonishing!!

- Here are examples of results, you can experience at a NOVA workshop based on our past experiences.
- Exploring new channels of perception
- Seeing your surrounding with eyes closed
- Feel the color of an object you hold in your hand
- Listen to what your inner voice tells you
- Taste and smell the answer
- Suddenly you know the answer to a question - it's just there
- Discover the light in you
- Increase your intuition
- Become self-confident
- Discover the genius in you

- Become aware of who you really are

The follow-up seminar is QSR (Quantum Speed Reading)

This seminar builds on the self-awareness and understanding of your learning abilities developed in the NOVA experience. It's a transformative experience that teaches children and adults to access and utilise their inner Screen and Third Eye.

Learning at the speed of light

QSR relies on the abilities of the right brain to convert frequencies into images.

Learning content:

- Exercises aimed at expanding your imagination and creativity. This includes the ability to abstract information from closed books and converting this data into images.
- You learn to fly into books: Books are quickly flicked through and information is absorbed and converted into pictures or words
- Books, vocabulary are translated into your native language
- You learn to use your inner screen to get answers, solutions and information
- You get access to a photographic memory
- Faster memorization
- Enjoy reading books and written works, develop a reading habit
- Develop your awareness of yourself as a learner and reader, this helps when engaging with information and could possibly increase your performance on IQ measurement tests
- Health improvement

This can make learning easy and intuitive like child's play. It is possible that school grades will improve through playful approach to learning.

Seeing the shining eyes, the joy and the liveliness of the people then fills me with great joy and enthusiasm.

Why you should take this course

I am one of the few people on the planet who offer QSR. I am a licensed trainer. Get ready for a surprise: I have taught NOVA and QSR at a school in Switzerland.

With my partner Dr. Raymond Fernando from New Zealand, I teach NOVA and QSR worldwide in person and online.

Group size: Small groups of 10 people who are interested in learning NOVA and QSR.

Parents can attend this workshop program with their children.

COSTS:

For children: (Aged 6-12)	Nova 390 € for a 2-day workshop
	QSR 470 € for a 2-day workshop
For adults:	NOVA 460 € for a 2-day workshop
	QSR 590 € for a 2-day workshop
